Type: ROUTINE INSPECTION
Date: 13-AUG-2014

3.31(a)(1)

SANITATION.

Two primary enclosures housing 11 and 12 guinea pigs respectively had accumulations of soiled bedding. Majority of the plastic enclosures have fly dirt stains on the surfaces. Ineffective cleaning and sanitation exposes the animals to disease hazards and health problems. Primary enclosures must be cleaned often enough to prevent an accumulation of dirt, debris, excreta, and soiled bedding and enclosures must be sanitized at least once every two weeks. Correct by ensuring that all primary enclosures are kept clean and sanitized often enough to prevent an accumulation of dirt, debris, excreta, and soiled bedding.

Correct by August 14, 2014

An exit briefing was conducted with owner.
