

## Inspection Report

Paul S Zook  
181 Amsterdam Rd  
New Holland, PA 17557

Customer ID: **32735**  
Certificate: **23-A-0621**  
Site: 001  
PAUL ZOOK

Type: ROUTINE INSPECTION  
Date: 09-AUG-2017

### 3.31(b)

#### SANITATION.

Housekeeping. The windows, walls, and ceiling are covered in cobwebs. There is dust and dirt on the window sills and walls. Housing facilities must be kept in a sanitary manner to prevent exposing the guinea pigs to potential disease hazards including fungal, bacterial, and viral agents. The licensee must ensure the building housing the animals is kept clean to maintain the health of the animals. Correct by August 16, 2017.

### 3.31(c)

#### SANITATION.

Pest Control. Numerous flies were observed in the guinea pig enclosures as well as throughout the building. Fly strips were present, but were covered with flies. There were six open windows in the facility, but no screens present to prevent the entry of flies. The presence of these pests creates conditions which promote undue stress for the animals and creates conditions which promote the spread of disease within the facility. Guinea pigs exposed to numerous flies can increase health hazards such as parasitic disease, bacterial disease, and viruses. Additional measures must be taken to control the fly problem such as increased sanitation, exclusion, other fly control products, and/or consulting with a pest control company. Licensee must establish and maintain an effective program for the control of pests to protect the health and well-being of the guinea pig colony. Correct by August 16, 2017.

This inspection and exit interview were conducted with the owner.
