Type: ROUTINE INSPECTION
Date: 28-OCT-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A black and tan female Yorkshire Terrier id number 07657077 had matting hair around her eyes on on her back. Matting hair can cause discomfort for the dogs and may lead to serious skin condition if not maintained. The owner must ensure that all the dogs have routinely maintained performed on them to include eyes, ears, teeth, feet, and the hair coat.

A white Havanese male id number 004588288 had matting hair around his legs and on his back. The matting hair was in a ball hanging from his rear legs. Matted hair can cause pain and discomfort for the dogs and if not maintained can cause skin irritation. All the dogs must be routinely maintained to prevent any matted hair from forming balls.

Owner must remove the matted hair from the dogs and routinely maintained the dog s coat. To be corrected by 10-30-2014.

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

*****There were surfaces in the kennel that were dirty. There was an excessive amount of dirt, food, gravel, and insulation pieces on the floor in animal enclosures and the common areas of the kennel. In each of the kennel buildings there was a buildup of dirt old food and feces on the floors and around the pads where the dogs lay. In the building housing the French bulldogs the walls and floors had a buildup of dirt and other debris on the floor along with the rodent feces. The building where the Yorkshire Terriers were housed has a buildup of dirt and other debris under the self-feeders and around the water nozzles. To be corrected by 11-01-2014

3.11(d) REPEAT

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

In the building where the French bulldogs were housed, there was a strong smell of rodent urine and visible droppings of feces on the floor of the housing area. During the inspection, there were mice actively moving in and

Inspection Report

around the kennel buildings. Additionally, there were areas in both buildings where rodents feces was noticed on the floor. Rodent or other vermin can carry disease that can adversely affect the health and well-being of the dogs being housed in the kennel. Owner must ensure that some kind of rodent control is being used routinely.

Inspection and exit interview conducted with facility representative
