WILD THINGS ZOOFARI INC.

Type: ROUTINE INSPECTION
Date: 14-NOV-2019

3.78(b)

OUTDOOR HOUSING FACILITIES.

The lemurs and the vervet monkey housed in outdoor enclosures were not provided with sufficient protection from the cold. The enclosures were equipped with wind breaks and wooden shelter boxes thus providing adequate protection from certain elements such as the sun, the wind and the rain. However, a heat source was not used to prevent the ambient temperature within the shelter from falling below 45 °F. The licensee explained that heaters were not currently being provided because of an electrical problem occurring in that outdoor area. The temperature outside was 41° F at the time of the inspection and was predicted to drop even lower overnight. At such low temperatures, non-human primates may experience discomfort and health issues such as frost bite. A system must be established in order to safely provide heat to prevent the ambient temperature within the shelter from falling below 45° F.

To be corrected by 11/15/19

This inspection and exit interview were conducted with the owner.
