### 3.125(a)

#### Facilities, general.

An 8 foot section of the interior fence, which divides the bucks from the does, has been damaged by a fallen tree. The tree bent the top rail and dislodged it from the top rail sleeves, which extend the length of the rail. It also caused the top of the fence fabric to sag. The fence still contains the deer however, it remains in in disrepair. Damaged fencing leaves the fence structurally unsound.

The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by August 8, 2023 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
