

Inspection Report

City Of Independence
811 W. Laurel
Independence, KS 67301

Customer ID: **4083**
Certificate: **48-C-0133**
Site: 001
City of Independence

Type: ROUTINE INSPECTION
Date: 19-AUG-2015

3.75(c)(2)

HOUSING FACILITIES, GENERAL.

All surfaces that house animals must be maintained on a regular basis. Two outside enclosures of the Stevens building/sheltered facility, housing one capuchin monkey and the other housing three spider monkeys, the concrete flooring has large cracks and a few places where the concrete is missing, leaving a small hole in the floor. These cracks are long and deep. Cracks in hard surface flooring where animals walk can be a hazard to the feet and toe/finger nails. Nails can become lodged and torn. Also, proper cleaning and sanitizing these cracked areas of flooring cannot be adequately done. Deep cracks in animal areas can harbor diseases and feces that cannot be washed out, properly cleaned and sanitized. The facility must replace these areas of the flooring to ensure that good cleaning and sanitization can be done and the monkeys are in a safe environment. This will help in the good health and care for the animals in this building.

This NCI was wrote up on previous inspection report and is not a repeat because the correction date of 08-26-2015 is still current at the time of this inspection on today's date.

3.125(a)

FACILITIES, GENERAL.

Housing facilities must be structurally sound and be maintained in good repair to protect animals from injury and to contain the animals in a safe manner. Two to three feet of a top portion of the enclosure fencing housing 3 Aoudad s (Barbary sheep), is in need of repair. The six foot wire mash fencing is smashed down about 6 to 8 inches and needs to be put back into place and properly secured. The facility representative must repair or replace this area of fencing and put into place a good maintenance program that daily inspects areas that contain animals. Correct by 08-26-2015

3.131(c)

SANITATION.

Premises that house animals must be in good repair in order to protect the animals from injury and to protect the health of the animals. The flooring in two outdoor concrete enclosures of the Stevens building, housing one bobcat in
