ELKADER, IA 52043

Customer ID: **5620**

Certificate: **42-C-0103**

Site: 001

CLAYTON COUNTY
CONSERVATION BOARD

Type: ROUTINE INSPECTION

Date: 28-SEP-2021

3.125(a)

Facilities, general.

* The interior fiberglass wallboard in the bear enclosure has several areas of missing fiberglass wallboard. Torn, missing wallboard with jagged, sharp edges were observed. The fiberglass wallboard is attached to the interior wood wall. One black bear is in contact with the affected fiberglass wall board located in outdoor housing. Jagged, sharp edges could cause potential injury to the bear. The licensee must ensure that all surfaces must be maintained in good repair to protect the animals from injury. Correct by 10/28/21

3.131(d)

Sanitation.

* Bird droppings were observed accumulating on the storage shelf and on the cement flooring located under both interior enclosure gates. The affected area is located in the red fox / racoon building. One red fox and one racoon are in contact with the affected area. The facility has no effective pest prevention program in place. No means to control or eliminate the birds were observed. Bird droppings can create unsanitary conditions in the facility. Birds can spread disease and contaminate food supplies. The licensee must establish an effective program for the control of insects and external parasites that are pests. This program must be established and maintained so as to promote the health and well-being of the animals and reduce contamination by pests in the animal area. Correct by 10/12/21.
