Menomonie Lions Club
Po Box 44
Menomonie, WI 54751

Customer ID: **2341**
Certificate: **35-C-0040**
Site: 001
MENOMONIE LIONS CLUB

Type: ROUTINE INSPECTION
Date: 16-MAR-2017

3.125(a)

FACILITIES, GENERAL.

There is an electrical cable near the water receptacle in the whitetail deer enclosure that appears to be hanging low enough for the deer to potentially make contact with it. This drooping cable is a potential injury hazard for the deer should they run into or brush against it. Remove or repair the drooping cable. Correct by March 21, 2017.

3.130

WATERING.

The water receptacles in the bison, elk and whitetail deer enclosures all have a yellowish-green colored material coating their sides and bottoms. The bison receptacle also has this material floating in the water. Unsanitary water receptacles do not promote good health and increase the risk of disease. Clean the water receptacles as often as necessary to keep them free from contaminants. Correct by March 23, 2017.

This inspection and exit interview were conducted with the facility representative.

End of report.
