Certificate: **93-C-1090**  
Site: 001  
Annette Pleis

Type: ROUTINE INSPECTION  
Date: 15-AUG-2016

---

**3.52(a) CRITICAL**  
**FACILITIES, OUTDOOR.**

Artificial cooling was not being provided to five rabbits housed outdoors at 14:45 hours on the day of the inspection. The atmospheric temperature at that time was 93.4 F. Two of the rabbits were observed to be panting.

Overheating may cause discomfort and adversely affect animal health. The facility should ensure that artificial cooling is provided to rabbits when the atmospheric temperature exceeds 90 F.

This non-compliant item was corrected at the time of the inspection.

**3.125(a)**  
**FACILITIES, GENERAL.**

Sharp objects were present in an enclosure housing hoof stock. The ends of a section of wire fencing were protruding into the enclosure. Two nails were protruding from a warped board on the side of a shelter in the same enclosure.

Sharp objects may cause injuries to the animals. Animal enclosures should be constructed and maintained in a manner that will protect the animals from injury.

Correct by August 24, 2016

An exit briefing was conducted with a facility representative.

---

**Prepared By:** MARCY ROSENDALE, D V M USDA, APHIS, Animal Care

**Date:**  
16-SEP-2016

**Title:** VETERINARY MEDICAL OFFICER 5039

**Received by Title:** DELIVERED BY EMAIL

**Date:**  
16-SEP-2016

## Inspection Report

---

The inspector completed this inspection report when Animal Care was transitioning to a new information management system. Because the inspector re-typed the inspection report into the new system when it was deployed, the "prepared by" date on this inspection report is different than the date the inspector prepared the original inspection report, which occurred on August 17, 2016.
