

## Inspection Report

Amos Fisher  
1052 Lancaster Pike  
Quarryville, PA 17566

Customer ID: **502991**  
Certificate: **23-A-0661**  
Site: 001  
AMOS FISHER

Type: ROUTINE INSPECTION  
Date: 12-JUN-2019

### 3.25(d) REPEAT

#### FACILITIES, GENERAL.

Waste disposal. There is stagnant water and debris on the floor of the facility and in the back left corner there is a buildup of waste material in front of the clogged drain. The back left corner had a strong foul odor by the clogged drain. Provisions must be made for the removal and disposal of animal waste, food waste, bedding and debris to minimize vermin infestations, odors, and disease hazards. Correct by ensuring the water lines, gutters, and drains are operating properly and cleaned so that stagnant liquid waste and debris are not accumulating on the floor to minimize infestations, odors and disease hazards.

Remains uncorrected.

### 3.31(b)

#### SANITATION.

Housekeeping. The floor contains accumulations of spilled feed, excreta, hay, shavings, and debris. There are accumulations of dust, dirt, cobwebs, and debris on floor, shelves, table, walls, and gutters hanging on the right side wall. Animal facilities must be kept clean and in good repair to prevent unnecessary disease risks. Ineffective cleaning exposes the animals to disease hazards and health problems. Correct by ensuring that the premises are kept clean, including: removing accumulations of dust, cobwebs, hay, excreta, shavings and debris from the floor, shelves, gutters, and table; routinely dusting off and sanitizing all surfaces inside the facility; and maintaining a level of general cleanliness to support good animal husbandry and health. Correct by June 15, 2019.

This inspection and exit interview were conducted with the owner's spouse.
