

Inspection Report

Los Angeles Zoo
5333 Zoo Drive
Los Angeles, CA 90027

Customer ID: **3532**
Certificate: **93-C-0043**
Site: 001
LOS ANGELES ZOO

Type: ROUTINE INSPECTION
Date: 20-SEP-2016

3.125(a)

FACILITIES, GENERAL.

In the back area of the kangaroo exhibit, there is wooden siding covering 2 beams where the edges around the bottom are in dis-repair and splintering ends remain. Animals coming in contact with these areas may become injured.

A system should be in place to ensure animal enclosures are maintained in good repair to protect the animals from injury.

To be corrected by November 20, 2016

3.129(a)

FEEDING.

The refrigerator in the back of the Australia house is being used to store both human and animal food. There is no clear signage/ indication which items are for animal use only. In addition, at least two food items were improperly stored, i.e. without a label and/or stored directly on the refrigerator shelf unprotected. Intermingling of human and animal food and Improper storage can lead to food contamination. A system should be in place to ensure the animal food is wholesome, palatable, and free from contamination and of nutritive value to maintain all animals in good health.

To be corrected by October 1, 2016

3.131(c)

SANITATION.

The following was noted in the kitchen/ food preparation area of the Australia house:

- The drying rack and pan have a moderate accumulation of mineral build-up and cannot be effectively cleaned.
- A soiled rag is being used to tie off a leaking faucet. This was removed during the inspection.
- There is a moderate accumulation of debris on the window seal, the top of the refrigerator, and in an area behind the drying rack and pan.

These areas should be maintained in a sanitary condition for the health of the animals.

A system should be in place and maintained to ensure premises, including food preparation areas, are kept clean to
