Date: 01-DEC-2015

### 3.4(b)

#### OUTDOOR HOUSING FACILITIES.

There is an outdoor primary enclosure area that contains 2 dogs a beagle and Pug that has a shelter box but no additional shade structure for the dogs to get out of the direct sun or elements. The shelter boxes of 2 outdoor enclosures need to have more bedding added to provide adequate insulation for temperatures that have been below 50 Degrees at night and during the day for the past week.

It is important for there to be other shade options available in the outdoor enclosure to allow the regulated animals to get out of the direct rays of the sun. There needs to be enough bedding added to the shelter boxes to provide enough insulation between the dogs and the ground in order to prevent the animals from getting too cold in low temperatures.

The licensee must provide one or more outside areas of shade, large enough for all animals to be able to occupy and lie down and turn around in order to get out of the direct rays of the sun. Additional bedding should be added when temperatures are below 50 degrees, and even more when temperatures go below 35 degrees.

To be corrected by: Shad to be added by December 15, 2015  
Add bedding to outdoor boxes by December 1, 2015

Inspection and exit interview conducted with licensee
