Type: ROUTINE INSPECTION

Date: 23-FEB-2015

3.78(b)

OUTDOOR HOUSING FACILITIES.

Sec. 3.78 Outdoor housing facilities. (d) Perimeter fence.

* A section of perimeter fence on the backside has been taken down. There was cattle paneling on the backside. This paneling has large openings and is not 6 feet tall. This paneling could let in unauthorized humans and animals to go through it or under allowing for unauthorized contact to the two primates. The primates housing facility must have a perimeter fence that is 6 feet tall. The perimeter fence must be constructed so it protects the primates by restricting unauthorized humans and animals the size of dogs, skunks, and raccoons from going through it or under it. Therefore, preventing unwanted contact and protection that will be provided with the perimeter fence.

To be corrected by, 30-March-2015.

This inspection and exit interview was conducted with a facility representative.

This inspection will be sent by e-mail.
