

Inspection Report

Arizona Center for Nature Conservation
455 N. Galvin Parkway
Phoenix, AZ 85008

Customer ID: **3432**

Certificate: **86-C-0001**

Site: 001

Arizona Center for Nature
Conservation

Type: ROUTINE INSPECTION

Date: 21-JUL-2025

3.75(c)(1)(i)

Housing facilities, general.

Three metal platform structures are excessively rusty in an outdoor enclosure for a troop of 23 Common Squirrel Monkeys. The platforms serve as climbing structures as well as an area to eat and rest for the animals. The metal poles, base of the poles and metal edges of the square platforms have dark red rust that is pitted and actively flaking. Rusted primary enclosure materials can lose structural integrity over time and cannot be properly cleaned and sanitized. Excessively rusty surfaces that animals have daily contact with can be injurious to the animals and make the sanitization process difficult. The licensee must ensure that any surfaces that come into contact with non-human primates are free of excessive rust that prevents the required cleaning and sanitization or results in the development of sharp points.

Correct by 22 September 2025.

3.150(c)(2)

Facilities, general.

Multiple enclosures for birds have varying amounts of rusty interior surfaces and/or fixtures.

****Two adult Rhinoceros Hornbills in individual outdoor enclosures that are adjacently housed have access to rusty ceilings. The enclosures are constructed of chain-link fencing including the ceiling. A fabric shade cloth is fastened over the top of each enclosure. The entirety of the chain-link fence ceilings are rusted and reddish in appearance.**

****The square metal dish platforms present in the individual holding enclosures and at the public display perch for two adult Scarlet Macaws have patches of red-orange rust and appear flaky.**

****The indoor portion of an enclosure for two White-Throated Ground Doves has a rusty corner where two metal walls join and meet the solid floor. The red rust is patchy and starting to flake.**

These rusted areas prevent appropriate cleaning and sanitization and may be injurious to birds. The facility shall ensure that any surfaces that the birds can encounter are free of excessive rust or damage that affects the structural integrity of the surface or prevents cleaning.
