Site: 001
HENRY AND MARY ESH

Type: ROUTINE INSPECTION
Date: 15-MAY-2019

3.25(d)

FACILITIES, GENERAL.

Various wastes, including bedding, grass, fecal material, debris, and waste water, were visualized outside of approximately 60% of the primary enclosures.

Accumulations of waste in the facility can create disease hazards for guinea pigs. Disposal facilities must be utilized, and wastes must be removed and disposed of, so that disease hazards can be minimized.

Wastes that have accumulated outside primary enclosures must be removed and disposed of by the licensee so that odors and disease hazards can be minimized.

Correct by May 26, 2019.

This inspection and exit interview were conducted with the licensee.
