Type: ROUTINE INSPECTION  
Date: 14-JAN-2016

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The licensee acquired 2 four eye opossums, 1 prairie dog, 1 skunk, & 1 goat since the last pre license inspection. These species were never added nor addressed on the licensee's program of veterinary care.

These species of mammals shall be included in your veterinary care program. Any new species shall also be promptly added in the future.

Correct by February 1, 2016

### 3.133

#### SEPARATION.

The skunk lives in the same primary enclosure as several psittacine birds that are overhead. The cage floor has accumulations of bird droppings and has an odor from these droppings. The skunk remained in his den box.

This living arrangement does not minimize the risk of contamination of the bird droppings falling into the food, water &/or onto the animal, and increases the risk of disease transmissions or discomfort.

Animals shall not be housed near animals that interfere with their health or cause discomfort.

Correct by January 21, 2016

The exit interview was conducted with the licensee
