Liverpool, NY 13088

Customer ID: **36569**
Certificate: **21-B-0155**
Site: 001
Biolink Inc

Type: RE-LICENSE INSPECTION
Date: 11-SEP-2024

2.40(a)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility's written program of veterinary care prescribes annual dosing of selamectin for guinea pig ectoparasite prevention. While no animals appear affected by parasitism, selamectin has not been applied to animals since 2022. There is no selamectin currently on hand or pending delivery. Failure to regularly provide parasite prevention as directed increases risks of parasitism to individuals which may then spread throughout the population. The facility must assure that the attending veterinarian has appropriate authority to ensure the provision of adequate veterinary care.

This is a 1st Re-License Inspection for a Class B license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by November 10, 2024 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
