Certificate: **21-R-0024**  
Site: 001  
ENVIRONMENTAL SCIENCE/  
FORESTRY

Type: ROUTINE INSPECTION  
Date: 03-JUL-2024

---

### 2.31(d)(1)(ii)

#### Institutional Animal Care and Use Committee (IACUC).

Under protocol 220601, wild small mammals may undergo procedures that can cause more than momentary pain and distress, including toe clipping and self-piercing ear-tagging. Some individuals may also be captured using lethal trapping methods if deemed necessary. The protocol, however, does not adequately affirm that the investigators have considered alternatives to these procedures and methods. This means more animals may be subjected to distressful procedures or lethal trapping than necessary. The protocol must provide a narrative description of the methods and sources used to determine that alternatives were not available.

Correct by 7/31/24, or before further trapping and sampling.

This inspection and exit interview were conducted with a facility representative.
