2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

No written Program of Veterinary Care (PVC) could be located during this inspection. The indicated Attending Veterinarian (AV) was contacted by phone by the inspector. The AV confirmed his role as AV for this facility. He stated that frequent and timely communications regarding any animal concerns routinely occur. His last documented visit to the facility was July 2020 and his last appointment for animals from Kaleideum occurred October 2020. The lack of a written PVC can lengthen the time taken for animals to receive adequate veterinary care. Each exhibitor shall employ an AV under formal arrangements. In the case of a consulting veterinarian, the formal arrangements shall include a written PVC. Correct by April 28, 2021.

2.75(b)(1)

Records: Dealers and exhibitors.

Complete records of disposition for two cattle and one sheep could not be located during this inspection. No person's name and address, or date of disposition was recorded. The ability to trace the movement of regulated animals is important for disease tracking and animal welfare purposes. Every exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the information required in this section of the regulations. Correct by April 28, 2021.
