Type: ROUTINE INSPECTION  
Date: 02-JUN-2014

### 2.75(b)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

There were 116 sheep present at the facility during this inspection. Several hours were spent trying to reconcile the discrepancy between the number of sheep seen and the initial numbers in the records. Ultimately the records provided by the facility indicated that 122 sheep should have been present at the facility. There were still 6 sheep that could not be accounted for in the records. The facility personnel could not find disposition records or death records for these 6 animals that were not present at the facility. Animal disposition records are required to trace animals for health and ownership purposes. Records on animal death and euthanasia are used to evaluate and monitor the health of the flock. Records must be kept for animals sold, euthanized, died or otherwise disposed of by the dealer.

Correct from this day forward.

An exit briefing was conducted with the resident attending veterinarian.
