Type: ROUTINE INSPECTION
Date: 31-MAY-2016

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***One older female alpine goat appeared thin around hip and spine area. The older goat is nursing one baby goat. Caretaker noted that the goat has been dewormed and is eating. The caretaker determined during the inspection that the baby goat could be weaned and proceeded to wean the baby goat.

***One older Dromedary male camel appears thin thru the hip and lower spine area. Caretaker noted that the older Dromedary camel has been dewormed and eating.

***One Bactrian male camel appears thin thru the hip and lower spine. Caretaker noted that the camel is eating and is dewormed monthly alternating several different wormers.

The attending veterinarian has not evaluated the animals to recommend treatments that may help with body conditions.

Due to the advanced age of the goat and the camel the attending veterinarian should determine if any special treatment is required to maintain adequate body conditions in older animals. Attending veterinarian needs to be notified to determine adequate care needed for goat and camels. Correct by June 9, 2016.

2.126(a)(2)

ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

The Program of Veterinary Care was not available during the inspection. It is important that all records are available in order for the inspector to determine the current status of each regulated animal. All records should be available for inspection to assure the health and well being of animals. Correct by June 9, 2016.

3.125(a)

FACILITIES, GENERAL.

Two African Crested porcupines left their original primary enclosure for the larger enclosure next door. The two African Crested porcupines are being fed and water is available in new enclosure. During the inspection the

Inspection Report

caretaker was unable to locate the two African Crested porcupines for inspection. Caretaker stated that food is being eaten that is left for the African Crested porcupines. Animals should be properly contained in order to assure the well being of the animals. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals. Correct by June 12, 2016

Exit briefing was conducted with owner.
