LONG ISLAND ZOOLOGICAL SOCIETY INC
296 WADING RIVER RD
MANORVILLE, NY 11949

Customer ID: **2136**
Certificate: **21-C-0056**
Site: 001
THE ANIMAL FARM

Type: ROUTINE INSPECTION
Date: 19-SEP-2022

2.40(a)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

Two of the zebras have overgrown front hooves. Overgrown hooves could impact the gait of these animals. The zebra hooves need to be addressed as hoof trimming is part of adequate veterinary care. Each exhibitor shall have an attending veterinarian who shall provide adequate veterinary care to its animals in compliance with this section.

TO BE CORRECTED BY: OCTOBER 10, 2022

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The facility notified the APHIS officials that their attending veterinarian had passed away. They currently have a new attending veterinarian; however, the written program was not updated. The written program of veterinary care needs to be updated and completed by the new attending veterinarian to ensure that the animals are receiving the appropriate care. The exhibitor shall employ an attending veterinarian under formal arrangements. Formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the exhibitor.

TO BE CORRECTED BY: OCTOBER 10, 2022

2.75(b)(1)

Inspection Report

Records: Dealers and exhibitors.

Fourteen (14) guinea pig infants were present at the time of inspection. Records of guinea pig births are not being documented or maintained. Every exhibitor shall make, keep and maintain records or forms that shall include any offspring born of any animal while in his or her possession or under his or her control. Facility needs to keep and maintain records of all animal births to ensure that animal acquisitions are appropriately documented.

TO BE CORRECTED BY: OCTOBER 10, 2022

3.31(a)(1)

Sanitation.

The tank housing approximately 15 guinea pigs has a layer of grime along the entire interior base of the glass walls of the tank. Primary enclosures shall be cleaned and sanitized often enough to prevent an accumulation of excreta or debris: Provided, however, that such enclosures shall be sanitized at least once every two weeks in the manner provided in paragraph (a)(4) of this section.

TO BE CORRECTED BY: OCTOBER 3, 2022

3.31(b)

Sanitation.

Housekeeping.

The room housing 34 guinea pigs and 5 rabbits has an accumulation spilled shavings and other debris on the floors surrounding the enclosures. Premises shall be kept clean and in good repair in order to facilitate the prescribed husbandry practices.

Inspection Report

3.81(c)(4)

Environment enhancement to promote psychological well-being.

The facility has a singly housed, 3-year-old, Japanese snow macaque on exhibit. He is unable to hear or see other nonhuman primates, which can affect his well-being. This macaque must be provided special attention regarding enhancement of his environment, based on the needs of the individual species and in accordance with the instructions of the attending veterinarian. The primate enrichment plan must be updated to address the singly housed, 3-year-old snow macaque and it must be approved by the attending veterinarian.

TO BE CORRECTED BY: OCTOBER 13, 2022

3.125(a)

Facilities, general.

In the goat enclosure, at the rear of the zoo, the chain-link tree guards are damaged at the base of two trees thus exposing damaged fence fabric and metal points. This damaged fence fabric could injure the goats housed therein. Facility must repair or replace the damaged fence fabric to maintain the tree guards in good repair and to protect the goats from injury.

TO BE CORRECTED BY: OCTOBER 14, 2022

This inspection and exit briefing were conducted with the facility representatives.
