Customer ID: **20133**

Certificate: **10-F-0010**

Site: 001

NATIONAL ZOOLOGICAL PARK

Type: ROUTINE INSPECTION

Date: 18-MAY-2016

3.131(d)

SANITATION.

***Mice are present in the gorilla and orangutan enclosures in the Ape House as well as in animal enclosures within the Small Mammal House. Mice have been an ongoing problem in these two buildings and measures have been taken to decrease the population. However, over time those measure have not been effective in controlling the population. An effective and safe program for controlling mammalian pests should be in place. An effective pest control program for mice must be established and maintained to protect the health of the animals housed within the buildings. Correct by June 30, 2016.

NOTE: A comprehensive pest control program for the Ape House and the Small Mammal House has been developed and portions of the plan have been implemented.

The exit briefing was conducted with the facility representative.
