Type: ROUTINE INSPECTION

Date: 24-JAN-2024

3.127(d)

Facilities, outdoor.

There is not an adequate perimeter fence surrounding the outdoor enclosure for two male raccoons. The current fence does not fully enclose the outdoor housing and is less than six feet in height. Additionally, the fence is not at least three feet away from the primary enclosure.

An insufficient perimeter fence cannot effectively act as secondary containment for the animals inside and can allow unwanted animals or people to enter the facility and potentially harm the animals within. The perimeter fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. It must be of sufficient height (at least six feet high) to keep animals and unauthorized persons out. It must be of sufficient distance (at least three feet) from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence.

To be corrected by March 22, 2024.

This inspection and exit interview were conducted with a facility representative.
