Site: 001  
ROBERT L SAWMILLER

Type: ROUTINE INSPECTION  
Date: 16-OCT-2019

### 2.50(c)(2)(i)

#### TIME AND METHOD OF IDENTIFICATION.

The licensee has no official identification for the dogs kept on the premises.

A class ``C" exhibitor shall identify all live dogs under his or her control or on his or her premises, whether held, purchased, or otherwise acquired by identifying each dog with an official USDA sequentially numbered tag that is kept on the door of the animal's cage or run.

An official USDA, sequentially numbered tag must be assigned to all dogs held on the premises. This tag must be affixed to the dogs run and moved whenever the dog is moved to a different run.

To be corrected by November 8, 2019.

### 2.75(a)

#### RECORDS: DEALERS AND EXHIBITORS.

The licensee does not have a record of animals on hand for the dogs kept at his facility.

Each exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning each dog or cat purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

Records must be created for all dogs purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

## Inspection Report

---

A record of animals on must be made, kept and maintained to record all animals acquired, sold, transported, died or euthanized or born on the premises.

To be corrected by November 1, 2019.

### 2.132(d)

#### **PROCUREMENT OF DOGS, CATS, AND OTHER ANIMALS; DEALERS.**

The licensee acquired 3 coati-mundi 29AUG2019 from an unlicensed dealer.

No dealer or exhibitor shall knowingly obtain any animal from any person who is required to be licensed but who does not hold a current, valid, and unsuspended license.

All wild or exotic animals must be acquired from licensed dealers.

To be corrected from this day forward.

### 3.4(b)

#### **OUTDOOR HOUSING FACILITIES.**

There is no shade structure in the dog enclosures. There is no wind break at the entrance of the shelters for the dogs. There was no clean and dry bedding in the shelters for the dogs housed outside.

Outdoor housing facilities must provide the animals with protection from the elements, including shade to protect from the direct rays of the sun, shelter structures with adequate wind and rain breaks at the entrances, and clean dry bedding material when the ambient temperature falls below 50 degrees F.

There have been only 2 nights since October 4th that the temperature did not fall below 50 degrees F. A search for the city location at weather.com shows the low temperature Sunday was 42 degrees F, Mondays low temperature was 37 degrees F and Tuesdays low was 31 degrees F. Bedding protects the dogs from the cold and aids in their health and comfort.

To be corrected by November 28, 2019.

### 3.6(a)(2)(i)

#### **PRIMARY ENCLOSURES.**

There are various rusty, old food receptacles and large sheets of metal that are in the primary enclosures for the

## Inspection Report

---

dogs. These metal containers and sheets have sharp points and jagged edges on them.

Primary enclosures for dogs and cats must meet the following minimum requirements. Have no sharp points or edges that could injure the dogs.

Remove all of the rusty food containers and sheets of metal that are rusted and have sharp, jagged edges that could injure a dog.

To be corrected by November 1, 2019.

### 3.9(b)

#### FEEDING.

Food receptacles are dirty and have not been cleaned or sanitized in more than 2 weeks.

Food receptacles must be used for dogs, must be readily accessible to all dogs, and must be located so as to minimize contamination by excreta and pests, and be protected from rain and snow. Feeding pans must either be made of a durable material that can be easily cleaned and sanitized or be disposable. If the food receptacles are not disposable, they must be kept clean and must be sanitized in accordance with Sec. 3.11(b) of this subpart. Sanitization is achieved by using one of the methods described in Sec. 3.11(b)(3) of this subpart.

Food receptacles must be used and must be cleaned and sanitized a minimum of every two weeks to reduce the risk of foodborne illness in the dogs.

To be corrected from this day forward.

### 3.10

#### WATERING.

All of the water receptacles for the dogs are either dirty, or have excessive algae growing in them.

Water receptacles must be kept clean and sanitized in accordance with Sec. 3.11(b) of this subpart,

All water receptacles must be kept clean and sanitized. The water receptacles must be sanitized a minimum of every 2 weeks.

To be corrected from this day forward.

## Inspection Report

---

### 3.11(a)

#### **CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.**

There is excessive feces and old bones in many dog enclosures.

Cleaning of primary enclosures. Excreta and food waste must be removed from primary enclosures daily to prevent soiling of the dogs contained in the primary enclosures, and to reduce disease hazards, insects, pests and odors.

Dog feces and food waste must be removed from primary enclosures daily. Clean waste from enclosures to reduce odor, pests and disease hazards.

To be corrected from this day forward.

### 3.127(d)

#### **FACILITIES, OUTDOOR.**

There is no perimeter fence around the coyote, the fox and the North American badgers.

On or after May 17, 2000, all outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Fences less than 6 feet high must be approved in writing by the Administrator. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. It must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence. Such fences less than 3 feet in distance from the primary enclosure must be approved in writing by the Administrator.

A perimeter fence no less than 6 feet high and 3 feet away from the primary enclosure must be constructed for all wild or exotic animals, or a perimeter fence variance can be requested.

To be corrected by November 28, 2019.

### 3.130

#### **WATERING.**

The water receptacles for the fox, coyote and North American badger are dirty and have excessive algae growing in them.

All water receptacles shall be kept clean and sanitary.

## Inspection Report

---

Clean water receptacles as often as necessary to provide potable water to the animals held at the facility.

To be corrected from this day forward.

This inspection was conducted on October 16, 2019 and the exit interview was conducted on November 5, 2019 with the licensee. At the conclusion of the exit interview the licensee refused to sign the inspection report.
