500 Ninos Drive
Santa Barbara, CA 93103

Customer ID: **3503**

Certificate: **93-C-0013**

Site: 001

SANTA BARBARA ZOOLOGICAL FOUNDATION

Type: ROUTINE INSPECTION

Date: 29-SEP-2014

3.75(e)

HOUSING FACILITIES, GENERAL.

Fly spray and other chemicals are being stored on a shelf adjacent to gorilla bedding storage. The bedding is being stored uncovered on a pallet. Supplies of bedding for non-human primates must be stored in a manner that protects the supplies from spoilage, contamination, and vermin infestation. The supplies must be stored off the floor and away from the walls, to allow cleaning underneath and around the supplies. Only the bedding currently being used may be kept in animal areas, and when not in actual use, open bedding supplies must be kept in leakproof containers with tightly fitting lids to prevent spoilage and contamination.

To be corrected by October 13, 2014

3.125(a)

FACILITIES, GENERAL.

There are 4 light fixtures in the giraffe barn with bare light bulbs directly over the animal areas. In the event a bulb breaks, it can shatter into animal areas possibly causing injury. Animal housing facilities, including barns and fixtures located within, should be maintained in a manner that protect the animals from injury.

To be corrected by December 8, 2014

3.125(c)

FACILITIES, GENERAL.

The top portions of a light fixture and bulb over the hay storage area for giraffes is covered by a moderate accumulation of dust. This dust, if disturbed, could fall into the hay being stored below it resulting in contamination of the feed. Food supplies should be stored in a manner that minimizes contamination to protect the health of the animals.

To be corrected by October 13, 2014

3.131(a)

SANITATION.

In the new small animal holding area, the seams between the concrete floor slabs are wide enough to allow excreta

Inspection Report

and other debris to collect within and the required cleaning may be prevented. Measures should be taken to ensure excreta and other debris cannot get lodged between the concrete floor slabs to prevent contamination of the animals contained therein and to minimize disease hazards.

To be corrected by November 1, 2014

An exit briefing was conducted with the facility representative.
