CHARLES Mc GINNIS & DEBBI
Mc GINNIS

Type: ROUTINE INSPECTION

Date: 15-JUL-2025

3.1(c)(3)

Repeat

Housing facilities, general.

During the inspection several enclosures in the sheltered building, housing ten adults and five puppies were excessively dirty. On the outside portion two enclosures had accumulated feces covering approximately 75% of the floor space. After announcing themselves and putting on booties inspectors noticed the licensee scraping out feces from these pens. On the inside portion there were numerous cobwebs and grime on the wires of the enclosures and feed containers. Also, in at least one pen it was noticed to be visibly damp and a layer of brown grime appearing to consist of hair, mud and feces covering the flooring. Feces, dirt, and grime can harbor organisms that can affect the health and well being of the dogs. Hard surfaces with which the dogs come in contact must be spot cleaned daily and sanitized in accordance with §3.11(b) of this subpart to prevent accumulation of excreta and reduce disease hazards. The licensee must ensure that cleaning and sanitization are done as frequently as necessary to maintain cleanliness.
To be correct by: July 22, 2025

This inspection and exit interview were conducted with the licensee.

Additional Inspectors:

Lindsay Livingston, VETERINARY MEDICAL OFFICER
