### 2.126(a)(2)

#### Access and inspection of records and property; submission of itineraries.

The facility representative was unable to locate the program of veterinary care or contingency plan. Not being able to produce a program of veterinary care or contingency plan during inspection doesn't allow for APHIS officials to ensure the animals are being cared for as per the instructions of the Attending Veterinarian and that an adequate emergency plan is in place for the facility. The licensee must find and produce the program of veterinary care and contingency plan at the next inspection. If the program of veterinary care and contingency plan can't be found, then the licensee must have the Attending Veterinarian fill out a new program of veterinary care and a new contingency plan must also be created. Correct starting on 12/16/24.

This inspection and exit interview were conducted with the facility representative.

End of report.
