Type: ROUTINE INSPECTION

Date: 06-JUL-2023

2.30(c) Critical

Registration.

The registrant failed to notify the AC Regional Director of a change in the address, and other changes in operations which affected its status as a research facility. On July 6th from 3:40 – 4:10 pm, the inspector arrived at the listed address to discover no research facility at the address provided, no regulated activity being performed from this address, and no representative at this location. A phone call to the listed number was not answered or returned, but a response to an email sent to the registrant was received. The registrant informed us that a series of unfortunate events beginning in October of 2022, caused him to change locations and temporarily suspend business.

Timely and accurate notification of changes in operation are critical to ensure proper regulatory oversight of all registered research facilities.

A research facility shall notify the AC Regional Director by certified mail of any change in the name, address, or ownership, or other change in operations affecting its status as a research facility, within 10 days after making such change. To be corrected by October 7, 2023.

This inspection and exit interview were conducted with no adult present.
