Customer ID: **900**
Certificate: **57-R-0005**
Site: 003
UNIVERSITY OF GEORGIA

Type: FOCUSED INSPECTION
Date: 20-JUL-2017

3.129(b) REPEAT

FEEDING.

The feeding troughs in an enclosure with nine white-tailed deer had dark grime build up and white splattering that appeared to be bird feces. Dirty feed receptacles and feed contaminated with fecal material may create health risks for the deer. Food and food receptacles must be kept clean and sanitary at all times. If self feeders are used, adequate measures shall be taken to prevent molding, contamination, or deterioration or caking of the food.

This inspection was conducted on July 18, 2017 thru July 20, 2017.

This was a full inspection except for nonhuman primate areas which were not inspected.

This inspection was conducted with the Director of University Research Animal Resources, the Attending Veterinarian and various staff. The exit interview was conducted with the Associate VP for Research and Compliance and the Attending Veterinarian.

Prepared By: LOERZEL SUZAN, D V M USDA, APHIS, Animal Care
