SPRINGFIELD PARK DISTRICT

Type: ROUTINE INSPECTION

Date: 30-JUN-2022

3.133 Critical

Separation.

According to facility representatives, on March 30, 2022, two adult male sugar gliders (#501213 and #501214) that had been housed together for several years were heard fighting in the pouch. Later they acted normal in the pouch, according to facility records. A facility representative conveyed that the two sugar gliders were checked that evening, and no injuries were observed and the pair was left housed together. On March 31, 2022, sugar glider #501214 was found in the wheel within the enclosure, which the facility representative indicated seemed out of the ordinary, and when he moved around, his back legs seemed not to be moving correctly. He was then evaluated and treated by the veterinarian, and the sugar gliders were separated. On April 1, 2022, sugar glider #501214 was found dead at the morning check.

Housing two animals together when they are incompatible with each other can create health risks, including the potential for injuries or death to one or both animals.

Animals housed in the same primary enclosure must be compatible. Animals shall not be housed near animals that interfere with their health or cause them discomfort.
