Perris, CA 92570

Customer ID: **3584**  
Certificate: **93-C-0423**  
Site: 001  
SERENA BURNETT & ANNE ABSEY

Type: ROUTINE INSPECTION  
Date: 24-DEC-2014

### 3.127(d)

#### FACILITIES, OUTDOOR.

The facility has 2 cougars housed in separate enclosures. The perimeter fence surrounding one of the cougar enclosures has a chain linked fence approximately 5 feet in height topped off with 4 strands of hot wire. The current set up may not be of sufficient height or strength to serve as a secondary containment system and/or to keep animals or unauthorized persons out.

Outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Perimeter fences for potentially dangerous animals, such as, but not limited to, large felines (e.g., lions, tigers, leopards, cougars, etc.) should be at least 8 feet in height. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

To be corrected by March 30, 2015

Note: the licensee has applied for a perimeter fence variance.

An exit briefing was conducted with a facility representative.

#### Additional Inspectors

Adviento Manuel, Veterinary Medical Officer

Prepared By: JEFFREY LEE, D V M USDA, APHIS, Animal Care

Date:  
17-FEB-2015
