GIBBON CONSERVATION CENTER

Type: ROUTINE INSPECTION

Date: 25-FEB-2014

3.78(d)

OUTDOOR HOUSING FACILITIES.

In an area behind the house, there are over hanging tree branches that are in contact with the perimeter fence. There is also a fence panel in this area that is less than 6 feet high. Although there is a wire kick-in present, this portion of the fence is next to a mound of dirt which diminishes the fence's effective height. The fence must be constructed and maintained so that it protects nonhuman primates by restricting unauthorized humans, and animals the size of dogs, skunks, and raccoons from entering the animal areas and having contact with the nonhuman primates.

To be corrected by May 1, 2014

An exit briefing was conducted with the facility representatives.
