Type: ROUTINE INSPECTION

Date: 30-APR-2025

---

### 2.126(c)

#### Access and inspection of records and property; submission of itineraries.

When the inspector called the licensee to announce their presence for an unannounced inspection, the licensee stated they were exhibiting at a county fair out of state. The licensee failed to provide an itinerary for animals in travel status and locations of exhibition to the Deputy Administrator. Failure to provide an itinerary at least two days in advance of overnight travel to any location other than the approved home site results in the Department's inability to conduct an inspection to ensure the welfare of the animals covered under the Animal Welfare Act.

Any person who is subject to the Animal Welfare regulations and intends to exhibit any animal at any location other than the approved site, shall submit a written itinerary to the Deputy Administrator. The itinerary shall include all information required in this section, but not limited to, the names, dates, and locations (with addresses) where the animals will travel, be housed, and be exhibited, including all anticipated dates and locations (with addresses) for any stops and layovers that allow or require removal of the animals from the transport enclosures.

Correct from this date forward of 01 May 2025.

### 2.134(b)

#### Contingency planning.

Last review of the contingency was over a year ago on 09 April 2024. Failure to conduct annual contingency plan reviews reduces the capability for disaster response and may impact animal welfare in the event of emergencies. The facility must ensure that the contingency plan is reviewed annually and that this review is documented. Additionally, this documentation must be available to APHIS upon request.

Correct by 30 May 2025.

### 3.150(c)

#### Facilities, general.

The indoor primary enclosure for 2 hyacinth macaws, 1 umbrella cockatoo, and 1 palm cockatoo has exposed foam insulation on the upper walls and ceiling due to maintenance activity by the facility. The birds have direct access to the

## Inspection Report

---

insulation and there is evidence that one or more birds is chewing and picking at this surface due to a pile of half inch chunks of insulation on the ground in one corner of the enclosure. Damaged interior surfaces of enclosures cannot be easily cleaned or sanitized and insulation material may not be safe for birds. The surfaces of housing facilities must be constructed in a manner and made of materials that allow them to be readily cleaned and/or sanitized, or removed and replaced when worn or soiled.

Correct by 15 May 2025.

This inspection and exit interview were conducted with the facility representatives.
