Site: 001

Fort - Wade Kennels L L C

Type: ROUTINE INSPECTION

Date: 18-APR-2017

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

At the time of inspection there was no written program of veterinary care available to review. The licensees are following vaccination and medication protocols but did not have the documentation from their attending veterinarian. A formal relationship with a veterinarian is very important for the health and well being of the facility animals. The veterinarian should be involved in all aspects of animal care including decisions on the frequency of routine health visits, preventative health protocols, animal husbandry, and other simple medical procedures such as tail docking and dew claw removal. A document generated by the attending veterinarian outlining their plan to accomplish these functions needs to be available for review during USDA inspections.

Correct by: June 20, 2017

This inspection and exit interview were conducted with the facility managers.
