#### Watering.

In an enclosure containing two pigs, the only water receptacle available has a coating of brown film on all interior surfaces and contains murky water. There is debris covering the bottom of the receptacle and old plant material floating in the water.

Contaminated water can cause illness or be unpalatable to animals. All water receptacles must be kept clean and sanitary.

To be corrected by 15 October 2021.

This inspection and exit interview were conducted with facility representatives.
