**Repeat**

**Cleaning, sanitization, housekeeping, and pest control.**

In the barn/breezeway adjacent to the non-human primate indoor housing, the pigeons have established nests, resulting in an accumulation of excreta in and adjacent to the barn. The indoor housing for primates is only accessible by walking through the barn area. The facility needs to establish and maintain an effective program to exclude pests to reduce contamination in the animal areas.

This inspection and exit interview were conducted with the managers.
