3.56(c)

SANITATION.

The rack holding the primary enclosures for the rabbits has a build up of, hair, food and excreta on the support bars and in the corners of the framework. Build-ups of this type increase disease hazards such as bacteria, pest control problems and possible contamination. The rack shall be cleaned at a rate that will minimize the build up and protect the health and well-being of the rabbits. Correct by August 31, 2016.

3.131(c)

SANITATION.

The food storage area in the barn is not clean. There is food, dust and debris on the floor, cart and containers. The room shall be swept out and all surfaces cleaned to minimize insects and vermin and to prevent contamination of the food, thereby, protecting the health and well-being of the animals. Correct by August 18, 2016.

The inspection and exit briefing conducted with the Associate Professor.
