Xtreme Exotics Wildlife Foundation
7324 Lynette Lane
Saint Augustine, FL 32095

Customer ID: **507070**

Certificate: **58-C-1227**

Site: 001

Xtreme Exotics Wildlife Foundation

Type: ROUTINE INSPECTION

Date: 17-OCT-2023

3.1(a)

Housing facilities, general.

Four enclosures housing 7, 5, 5, and 8 domestic kittens had electrical wires in the enclosures. Unprotected electrical wires in enclosures pose a risk of shock, electrocution, and strangulation. The electrical wires need to be oriented in such a way that the animals cannot interact with them.

Correct by October 24, 2023

3.75(a)

Housing facilities, general.

An enclosure housing 4 red ruffed lemurs and 1 black-and-white ruffed lemur, an enclosure housing 4 common squirrel monkeys, an enclosure housing 2 ring-tailed lemurs, and an enclosure housing 2 common brown lemurs had electrical wires in the enclosures. Unprotected electrical wires in enclosures pose a risk of shock, electrocution, and strangulation. The electrical wires need to be oriented in such a way that the animals cannot interact with them.

Correct by October 24, 2023

3.78(e)

Outdoor housing facilities.

The licensee exhibits animals in a manner that does not pose minimal risk of harm to the animals and to the public, nor in a way that the animals are under the direct control and supervision of an experienced handler or trainer at all times when the public is present.

May 14 2023, a member of the public posted photos of a minor child holding a ring-tailed lemur at the licensee's facility. There was not an identifiable method of effective direct control by an experienced handler or established barrier in this photo with the public member and the ring-tailed lemur.

May 14 2023, a member of the public posted photos of herself and a second adult on social media holding a ring-tailed lemur at the licensee's facility. There was not an identifiable method of effective direct control by an experienced handler or established barrier in this photo with the public member or the ring-tailed lemur.

May 4 2023, a member of the public posted photos of herself on social media holding a ring-tailed lemur and a brown capuchin and interacting with a red ruffed lemur at the licensee's facility. There was not an identifiable method of effective direct control by an experienced handler or established barrier in this photo with the public member and the red ruffed lemur, the ring-tailed lemur, or the brown capuchin. The May 4 picture shows a lemur up by a patron's head and face.

Inspection Report

This increases the risk of harm, injury and/or zoonotic concerns to the public and animal.

USDA Officials showed the licensee an assortment of these social media photos and they confirmed that these were their animals. During public exhibition, any animal must be handled so that there is minimal risk of harm to the animal and to the public with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public. The facility should ensure the well-being of both parties by not allowing members of the public to handle animals without the facility maintaining direct control. When allowing members of the public to hold the animal, then physical control is necessary to ensure the experienced handler maintains adequate direct control at all times. Additionally, the facility's volunteers and/or employees should be readily identifiable and have the appropriate documentation showing their training/experience with handling animals.

Correct by December 19, 2023

3.125(a)

Facilities, general.

An enclosure housing 1 bat-eared fox and 1 cape fox and an enclosure housing 1 prehensile-tailed porcupine had electrical wires in the enclosures. Unprotected electrical wires in enclosures pose a risk of shock, electrocution, and strangulation. The electrical wires need to be oriented in such a way that the animals cannot interact with them.

Correct by October 24, 2023

This inspection and exit interview were conducted with a facility representative.
