Brookfield, IL 60513

Customer ID: **2567**

Certificate: **33-C-0003**

Site: 001

Chicago Zoological Society

Type: FOCUSED INSPECTION

Date: 17-JUL-2025

3.125(a)

Facilities, general.

**On May 28, 2025, a three-month-old female Nyala calf was found to have gained access into the exclusion containment area of the enclosure. The female calf was able to access an approximately 8" x 10" opening in the bottom of the fencing separating the exclusion and field area(s) where the animals are housed. The calf was caught and moved to the catch pen at the back of the enclosure to be reunited with her dam. The damaged portions of the fencing were repaired with additional wood reinforcements. Outdoor housing facilities should be maintained in a manner to keep the facilities structurally sound and in good repair in order to contain and protect the animals from harm.

**Corrections were made prior to the inspection.

This inspection and exit interview were conducted with facility representatives.
