Type: ROUTINE INSPECTION

Date: 13-MAY-2014

3.130

WATERING.

The water receptacle for the elk herd has a buildup of algae and other organic material on the inside surfaces of the the tank.

Unclean water receptacles can contaminate the drinking water and can pose a potential disease hazard to the animals.

The water tank must be cleaned and maintained as often as necessary to prevent a buildup of organic materials from developing in the water tank.

Correct by May 16, 2014.

Inspection and exit interview conducted with facility representatives.

End of report.
