3.75(c)(3)

HOUSING FACILITIES, GENERAL.

Section 3.75(c)(3) Cleaning: The indoor portion of the enclosure housing five squirrel monkeys has an excessive accumulation of feces and food waste adhering to the perches, branches and flat surfaces. The soiled surfaces may promote the growth of bacteria and cause illness in the monkeys. The excreta may attract flies and produce an odor. The hard surfaces in the squirrel monkey enclosure must be cleaned/sanitized at regular intervals to reduce disease hazards, insects and odors.

Correct by June 18, 2014.

An exit briefing was conducted with the farm manager.
