Type: ROUTINE INSPECTION
Date: 09-MAR-2017

3.75(c)(1)

HOUSING FACILITIES, GENERAL.

The paint is flaking off of concrete surfaces in the indoor portion of the sheltered macaque enclosure. The majority of the wear is along the base of the walls and the floor. Flaking paint shows that the surfaces are not being maintained so that they are readily cleaned and sanitized which can play a role in disease transmission. The facility must ensure that surfaces of housing facilities must be constructed in a manner and made of materials that allow them to be readily cleaned and sanitized, or removed or replaced when worn or soiled. To be corrected 9 April 2017.

This inspection and exit interview were conducted with facility representative.
