Type: ROUTINE INSPECTION
Date: 10-JUL-2025

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The written program of veterinary care is missing. Animal health may be at risk without readily available veterinary guidance. Licensee shall employ an attending veterinarian under formal arrangements, which includes a written program of veterinary care.

2.40(b)(2) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

Two blue and gold macaws are excessively itchy. The birds are constantly scratching and picking at themselves. Many of their feathers are missing, exposing bare skin. The skin appears thick and lumpy with spots of blood diffusely present. The birds have not been treated, nor evaluated by a veterinarian, and are in distress. Each licensee shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries. A licensed veterinarian must be consulted for examination, diagnosis, and treatment. Veterinary treatment guidance must be followed exactly.

2.75(b)

Records: Dealers and exhibitors.

The facility does not have an accurate, up to date inventory of animals on hand. One inventory was found dated eight years ago. It is difficult to trace animals in the event of a disease outbreak without accurate records. Licensee shall make, keep, and maintain records which fully and correctly disclose the required information, including animals on hand, those born or hatched, transported, sold, euthanized, or other dispositions.
