

Inspection Report

Commonwealth Zoological Corporation
One Franklin Park Road
Boston, MA 02121

Customer ID: **1973**

Certificate: **14-C-0001**

Site: 001

Commonwealth Zoological
Corporation

Type: ROUTINE INSPECTION

Date: 16-DEC-2024

3.150(a)

Facilities, general.

Multiple birds had access to unprotected electrical extension cords, including the whooping cranes, flamingos, black swan, and birds accessing the jungle riverbank area. Birds may manipulate and damage electrical cords, and then be at a risk of shock. The facility must ensure that electrical cords are protected to prevent potential injury to the birds.

Correct by December 31, 2024.

3.125(a)

Repeat

Facilities, general.

6 sheep had water provided in a bucket with an unprotected water heater electrical cord. Unprotected cords may be damaged by animals, leading to a risk of shock to the animals. The facility must ensure that electrical cords are protected. Correct by December 31, 2024.

3.130

Critical

Watering.

The misting line used for a watering system in the Seba's short tailed bat enclosure failed to work on November 15, 2024. Despite offering liquid diet and water in bowls, an acute mortality event occurred, and 56 bats were found dead over the following two days. The facility must ensure that adequate potable water is accessible to the animals in a way that they will comfortably drink.

Corrected by November 17, 2024.

3.150(c)(1)

Facilities, general.

A blue and gold and a green winged macaw were housed in an enclosure with a pipe covered in old insulating material that they could potentially access and ingest. Pipe insulation can be toxic to birds, or may present a risk of foreign body obstruction if ingested. The facility must ensure that surfaces in primary enclosure for birds do not have any potentially

Inspection Report

toxic, hazardous materials.

Correct by December 24, 2024.

3.153(a)(2)

Primary enclosures.

8 chickens did not have perches for roosting in their overnight housing, although perching is present in the day yard. Chickens often roost(perch) to sleep, and the lack of perching space may cause stress and poor resting quality. The facility must ensure that perching is available for the birds in their overnight enclosure.

Correct by January 10, 2024.

This inspection and exit interview were conducted with the facility representatives.
