Site: 001  
MEGAN GUARDIOLA

Type: ROUTINE INSPECTION  
Date: 05-NOV-2019

**2.40(b)(3)**

**REPEAT**

### **ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).**

\*\*\*In the pig enclosure, there were at least four grower pigs (one spotted black and gray, one black with four light feet, one black with white blaze on the nose and one black with white spot between the eyes) that were thin with sunken in flanks and tucked back ends. The licensee stated that the pigs are dewormed once a month and that they were last dewormed the middle of October. The licensee also stated that the pigs (33) are fed all together, two bags of grain pellets, once a day. The attending veterinarian had not been contacted as the veterinarian was due to conduct an inspection on 11/6/19.

The licensee attempted to contact the attending veterinarian during the inspection, yet the veterinarian was unavailable prior to the end of the inspection. Contact was made on 11/6/19. The licensee must follow the recommendations by the attending veterinarian for this condition. The licensee must also observe the animals daily and ensure that accurate information concerning possible medical issues for all of the animals is relayed to the attending veterinarian in a timely manner as required.

This inspection began at 1155.

This inspection and exit interview were conducted with the facility representative.

End of report.
