Type: ROUTINE INSPECTION

Date: 17-MAR-2022

3.125(a)

Facilities, general.

The roof over the facility's animal hospital and connected giraffe building are in disrepair. There are large sections of the ceilings indoors (hallways, quarantine holding rooms, treatment areas) that are leaking from snow melt on the roof or rain allowing water to come into the building. In a few areas, ceiling panels have collapsed from the weight of water. There is evidence of water damage on walls and ceilings throughout the building and buckets on the floor collecting water. Water damage this extensive can cause structural integrity issues with the building and allow water to get trapped in areas which can become a breeding ground for mold. Soft sections of the roof can create openings for pests to get into the building and create living areas for these animals. The roof of these buildings must be addressed and maintained in good repair to keep the facilities structurally sound and to protect the safety and health of the animals.

Correct by: May 1, 2022

This inspection and exit interview were conducted with a facility representative.
