Zootastic Of Lake Norman Inc
448 Pilch Road
Troutman, NC 28166

Customer ID: **44266**

Certificate: **55-C-0272**

Site: 001

ZOOTASTIC OF LAKE NORMAN INC

Type: ROUTINE INSPECTION

Date: 03-APR-2018

2.40(b)(2)

REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Two bottles of expired atipamezol and one bottle of compounded BAM with no expiration date were found in the mobile drug/darting container. One bottle of expired atipamezol was found in the cabinet in the pharmacy area. The use of expired drugs can yield unanticipated reactions when used in animals. Assure that all medications are monitored for expiration dates and are discarded appropriately when expired.

2.131(d)(2)

HANDLING OF ANIMALS.

Unattended public contact and feeding of animals was noted in three areas of the facility:

- A patron was observed approaching two zebra at the drive-through fence next to the lion enclosure. The patron reached out to the zebra through the fence.
- Three groups of patrons were observed in the petting zoo area feeding and patting the goats.
- Three groups of patrons and two individuals were observed in the barn area feeding the goats, deer, antelope, and alpacas.

Unsupervised public contact and feeding of animals can pose an injury risk to the animals and the patrons. A responsible, knowledgeable and readily-identifiable employee or attendant must be present at all times during periods of public contact. Correct from this day forward.

3.129(a)

REPEAT

FEEDING.

The cooler in the food prep room contained spoiled produce held in unsanitary conditions. Spoiled or unwholesome apples, artichokes, grapes, mangoes, leafy greens, and pineapples were contained on shelves and crates contaminated with brown grime and white filmy material. Unwholesome, unpalatable and potentially contaminated foods can cause illness in animals receiving these materials. Note: Licensee completely emptied the cooler and pressure washed it before the conclusion of this inspection.

3.129(b)

Prepared By: MCBRIDE MARY ANN, D V M USDA, APHIS, Animal Care

Inspection Report

FEEDING.

Food receptacles for the mature giraffes, the kangaroos/wallabies, and the barn enclosure housing goats and young alpaca were coated in brown grime and excessive dust and dirt. Unsanitary food receptacles can serve as disease reservoirs for the animals eating from them. Food receptacles shall be kept clean and sanitary at all times. Correct by 4/5/18.

This inspection and exit interview were conducted with the facility owner.
