PRIMARY ENCLOSURES.

In the main row of doe cages (built before 1990), measuring 30"x42"= 1,260 square inches of space, there were 5 rabbits all over 6 lbs in one cage. Each rabbit over 6 lbs requires 288 square inches of space, so 5 rabbits over 6 lbs requires (5x288=)1440 square inches. In this size of doe cage, a maximum of 4 rabbits over 6 lbs can be housed in order to meet the space regulation.

One rabbit was immediately removed from the doe cage.

Corrected during inspection.

Exit Interview conducted with facility representative.
