Type: ROUTINE INSPECTION

Date: 28-MAY-2015

### 2.40(b)(2)

### REPEAT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

In the small breed dog building, there is a male Yorkshire terrier (microchip #109 833 886) with a buildup of a thick brownish substance on the canine teeth and cheek teeth. The bottom canine tooth on the left side of the mouth is loose and easily moved when touched by the inspector. The first cheek tooth on the upper right side of the mouth is loose and also easily moved when touched by the inspector. This dog has not been evaluated by a licensed veterinarian. Poor dental health and loose teeth may cause pain and discomfort to the dog as well as lead to further health issues. This dog must be evaluated by a licensed veterinarian by June 3, 2015 for proper diagnosis and treatment plan. Documentation of the licensed veterinarian's evaluation and treatment plan must be available to the inspectors upon request.

In the small breed dog building, a female Shih Tzu's (microchip #0A02380041) right eye was grey in appearance and had an area in the center of the eye's surface that was white and irregular. Both eyes had crusty material around the eyes. The facility has not had the dog's eyes evaluated by a licensed veterinarian and no treatment has been initiated. Eye problems can be painful and can get worse if not treated promptly per the licensed veterinarian's recommendations. This dog must be evaluated by a licensed veterinarian by June 3, 2015 for proper diagnosis and treatment plan. The facility must follow the recommended treatment plan. Documentation of the licensed veterinarian's evaluation and treatment plan must be available to the inspectors upon request.

Male Toy Poodle (microchip #484 370 7F25) cited under 2.40 (b) (2) on inspection report dated November 5, 2014 has been evaluated by a licensed veterinarian and received treatment.

Exit interview conducted with facility representative.
